ANKIT KUMAR GUPTA

Software Development Engineer · C++ · Java · TypeScript · DSA · AI-Assisted Development

6295157674 | ankitkumargup143@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

EDUCATION

G.L. Bajaj Institute of Technology and Management — *Greater Noida, India*
B.Tech, Computer Science and Engineering · CGPA: 8.0 — 2023 – 2027

RLJDMC DAV Public School — *Raniganj, India*
Intermediate (Class XII) · 86% — 2022

St. Michael's School — *Durgapur, India*
High School (Class X) · 86% — 2020

PROJECTS

Rydex — Multi-Partner Vehicle Booking Platform *(Next.js, TypeScript, Node.js, MongoDB, Razorpay)* GitHub | Live

- Built a full-stack, multi-role vehicle booking platform with 3 dashboards (User, Partner, Admin) using Next.js and TypeScript, reducing booking workflow steps by 40%
- Implemented secure authentication via NextAuth.js (Google OAuth + email/OTP) with role-based access control through Next.js middleware, supporting 3 distinct user roles
- Designed and tested REST APIs for booking, payment, and onboarding using AI-assisted tools (GitHub Copilot), validating generated logic and edge cases
- Integrated Razorpay for online payments with automated 90/10 revenue split between partner and admin, processing transactions across 5+ vehicle categories
- Enabled real-time ride tracking with pickup/drop OTP verification and an AI-powered in-ride chat assistant between user and driver, cutting support queries by 30%
- Integrated Cloudinary for document/image uploads and Jigo Cloud for video KYC; managed global state across 3 roles using Redux Toolkit with async thunks

MultiCart — Multi-Vendor E-Commerce Platform *(Next.js, TypeScript, Node.js, MongoDB, Stripe)* GitHub | Live

- Built a full-stack multi-vendor e-commerce platform with 3 roles (User, Vendor, Admin) using Next.js and TypeScript, supporting 10+ concurrent vendors
- Set up authentication via NextAuth.js with Google OAuth and credential-based login backed by JWT sessions, cutting auth errors by 35%
- Developed a vendor verification flow where vendors submit business details (Shop Name, GST, Address) for admin approval, onboarding vendors in under 24 hours
- Integrated Stripe payment gateway with OTP-based order delivery verification, return, and refund support across 4+ order states
- Added an AI-assisted messaging layer spanning admin-vendor and vendor-user channels, with role-based access restrictions across 3 communication paths
- Wrote and debugged unit/integration tests for core order and payment flows using an Agile, iterative approach
- Managed global state with Redux Toolkit slices for current user and vendor data using custom async hooks, reducing redundant API calls by 40%

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & DBs: React, Node.js, Express.js, Next.js, Tailwind CSS, MongoDB, Mongoose, MySQL
DevOps Tools: Git, GitHub, VS Code, Vercel, Docker, Jenkins, GitLab, Shell Scripting, AWS
AI & Practices: GitHub Copilot, Cursor, ChatGPT, Agile/Scrum, REST APIs
AI/ML Concepts: Generative AI, RAG (Retrieval-Augmented Generation), LLMs, Prompt Engineering
Core Concepts: OOP, DSA, DBMS, OS, CN
Non-Technical: Communication, Teamwork, Problem-Solving, Time Management, Creativity

CERTIFICATIONS

Building AI Apps with MongoDB with AWS — MongoDB — View Certificate
Cisco Cybersecurity Virtual Internship — Cisco — View Certificate

ACHIEVEMENTS

- Competitive Programming: Solved 1000+ coding problems across multiple platforms. Achieved 1500+ rating on LeetCode, demonstrating strong algorithmic and problem-solving skills.
- Participated in the Smart India Hackathon (SIH), gaining experience in team-based, time-bound problem solving for real-world challenges.
- Participated in a Hackathon by IIIT Delhi (IIITD), developing innovative solutions under competitive conditions.
